bar tables made of concrete - "concrete meets cocktail"

09/2022 (english edition)

# concrete

Concrete in the design context is more than just a building material; it is a medium that conveys emotions and creates an atmosphere. The rough texture and clean lines of concrete can evoke a range of feelings, from strength and stability to calmness and serenity.

# CONCRETE MEETS COCKTAIL

Design-Kintsugi in relation to concrete

The classic "Alpine Martini" cocktail

# inspiration

## 金継ぎ - Kintsugi

Kintsugi is a Japanese art form in which broken ceramics are repaired with gold or silver, highlighting the fractures and giving the object a new beauty. When we apply this concept to concrete, a fascinating connection between tradition and modernity is created.

The bar tables are being delivered

Handmade

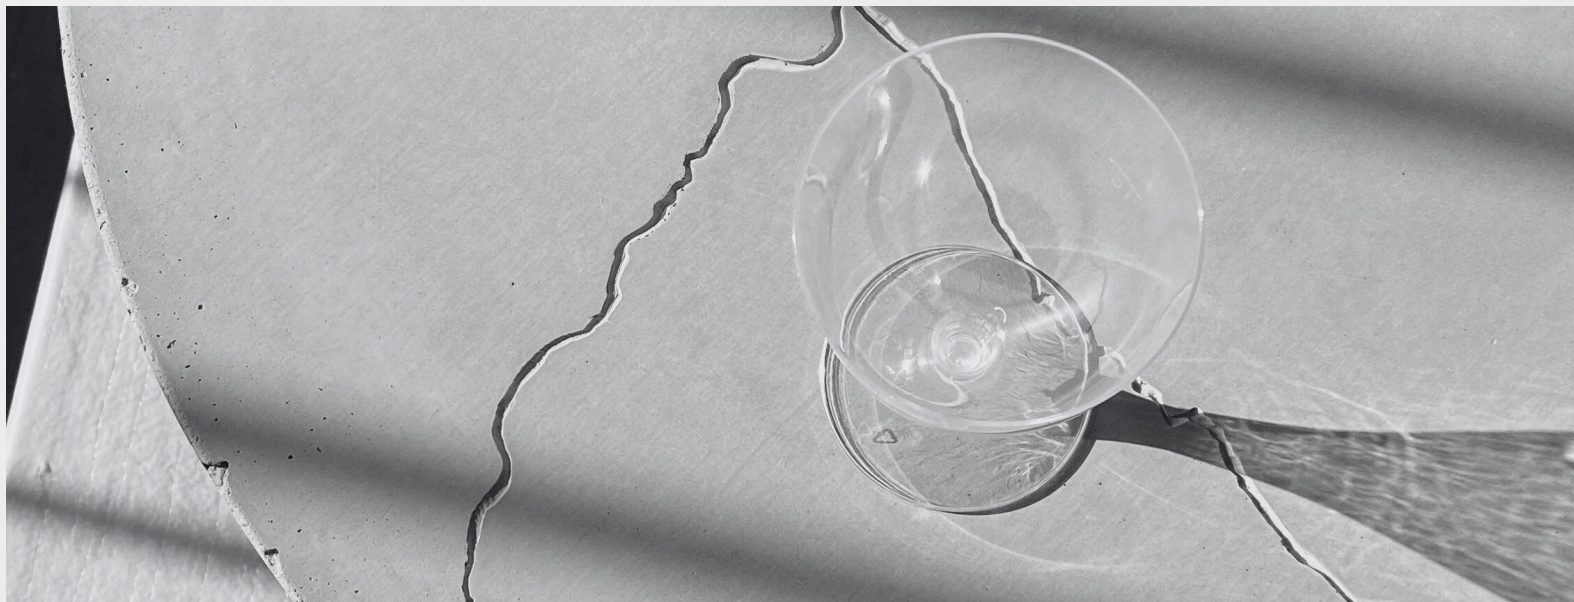

Photo in the studio

In the vibrant streets of Zurich, an oasis of elegance and sophistication rises - "no idea", the cocktail bar, wrapped in a design of concrete. Here, where the heart of the city pulses and the nights come alive, the raw beauty of concrete meets the art of mixology.

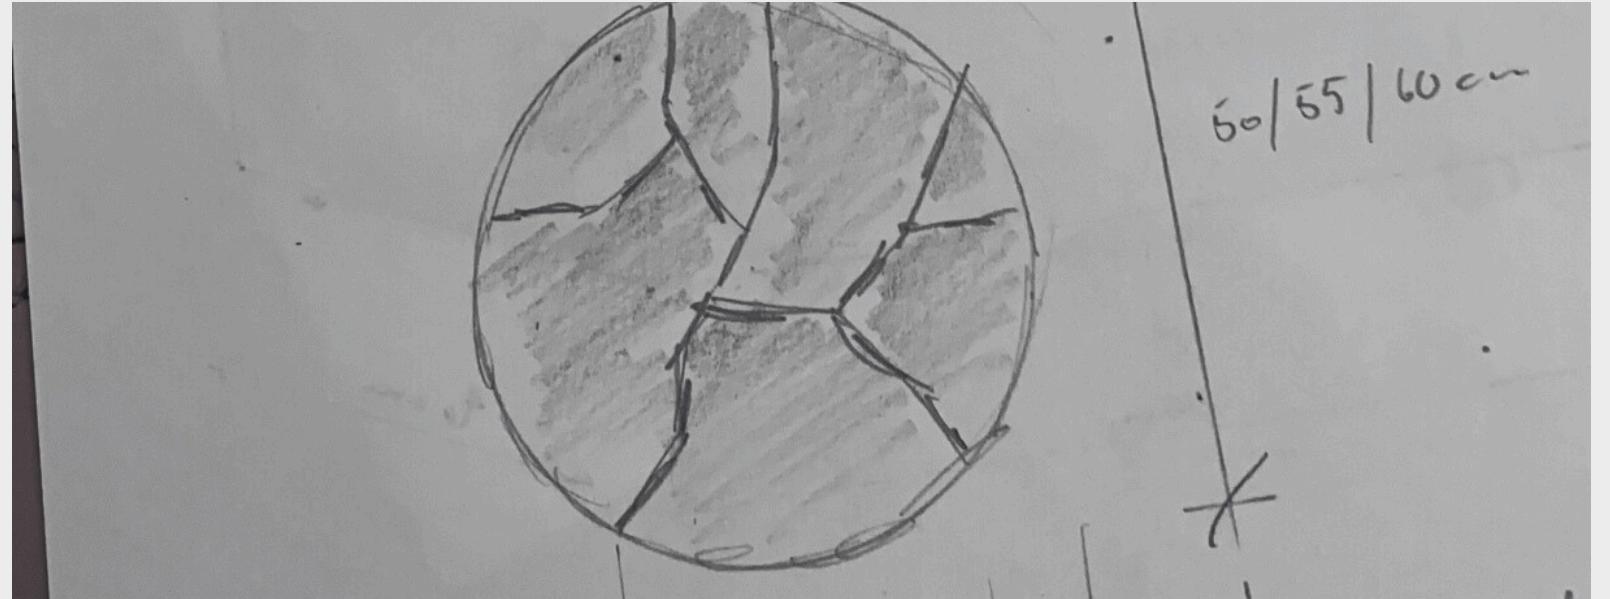

The bestseller "rice ice baby" whiskey
